

**SCHEDULE OF RATES AND FEES – SEWER**  
**DEFINITIONS**

1. **Base Rate** - The Base Rate is charged quarterly per account and is used to cover a portion of the Sewer Budget fixed expenses.
2. **Use Rate** - The Use Rate is dependent on metered consumption and is used to cover the variable portion of the Sewer Budget and the remaining fixed cost.
3. **Non-Metered Use Rate** - The Non-Metered Use Rate is used in place of the Use Rate as discussed above, for accounts that do not have a water meter.
4. **Delinquent Interest Rate** - The delinquent interest rate shall be applied to all delinquent sewer charges on a monthly basis. Delinquent sewer charges are those charges that have not been paid by the due date posted on the sewer bill or within thirty (30) days from the bill's postmark date.
5. **Application Fee** - The application charge is assessed on each new account, and on each existing account transferred to a new owner or otherwise changed.
6. **One-Time System Fee** - The One-Time System Fee is that fee assessed on all new services connecting to the municipal sewer system and any account with a change of use whose proposed flow basis is greater than the existing flow basis. The fee shall be determined on a gallon per day flow basis calculated from the Environmental Protection Rules, Chapter 1, current edition. For accounts with a change of use, the fee shall be based on the net increase in flow basis in gallons per day.
7. **Service Wye Inspection Fee** - The Service Wye Inspection Fee is for inspecting each sewer service connection to the municipal sewer main.
8. **Miscellaneous Fees** - In addition to the fees noted above, the Town may bill additional fees such as fees for sewer system related work or additional inspection that is necessitated by actions of applicants, customers or other persons, or by the Fair Haven Sewer Ordinance, current edition. These fees shall be for materials and equipment at cost, plus labor at the current hourly rate.
